

Dear St. Catherine Parents,

Your child will have the opportunity to participate in climbing wall activities as part of our PE program.

We are using a traverse climbing wall to host many exciting activities. At its highest point, the wall measures 8 feet and is 16 feet long. Participants climb horizontally (traverse) across the wall and their feet should never be more than 3-3.5 feet off the ground. Your child will be informed of safety rules and will climb under the supervision of an adult instructor at all times.

In order for your child to participate in climbing wall activities, we must have a signed permission slip on file in the school office. Should you have any questions regarding this exciting opportunity, please contact Kathy Cox at kcox@stcatherineschool.net.

Permission to Participate

My child, _____ (student name), has my permission to participate in climbing wall activities at St. Catherine School. I understand that this activity involves some risk of injury and I will stress the importance of following the class safety rules when we discuss this activity at home.
